MISSION

“ We are a quality-driven manufacturer of IVD reagents and diagnostic devices committed to improving healthcare through innovative, dependable testing solutions. **Our goal** is to increase global access to accurate diagnostics through strong, long-term collaborations with distributors and healthcare providers globally.”

Hemalive Company offers a comprehensive range of diagnostic kits to support accurate and efficient laboratory testing. Our product line includes Clinical Chemistry kits, Turbidimetry kits, Febrile Antigens kits, Serological Latex kits, and a wide selection of Rapid Test kits covering Infectious Diseases, Tumor Markers, Syphilis, and Urine Analysis. We are committed to providing healthcare professionals with affordable, high-quality laboratory tools backed by excellent customer service and dependable technical support. With a strong emphasis on quality and customer satisfaction, **Hemalive** continues to be a trusted partner in the medical diagnostics industry.

Instruments & Devices

HEMATRY-240

Auto Chemistry Analyzer

Features

- Automatic, Random Access
- Up to 160 tests per hour
- Reagent pre-heating, liquid level detection
- Automatic 8 steps washing system (optional), Low carry-over
- Labor saving, simple programming and real walk-away operation
- 24 hours non-stop reagent cooling compartment
- Reagent open system, close system on request
- Micro-volume for sample and reagent
- User-friendly software based on Windows Operation System

Hemalyte - 40

Electrolyte Analyzer

- Fast response speed of embedded CPU, test results inner memory chip can save up to 10,000.
- Due to all accumulated records permanently stored in memory chip, the business mode of medical device rental is feasible for separate business accounting.

- The test speed of electrolyte items < 60s/sample, with calibration of every test to eliminate the potential drift of the electrodes.
- With the progress bar showing on the bottom of screen, the measurement process can be observed directly.

- Support self-defined time when system is into the standby mode, and auto maintenance frequency that it is under the standby status.
- Support 7*24 hours online.

- Support 3 level QCs, and 30-day QC curves can be recorded, Support single-point & double-points calibration.

- With the well maintenance, debug, and other self-defined functions, the real-time electrode potentials could be displayed, hence the electrodes status can be checked out.

Cassette Reader

Description

HRR-200 a test strip reader are suitable for test the immunochromatographic test strips. By using modern photoelectric technology and photo-diode to detect the intensity of the reflected light, the reader can detect the color of the strip, then calculate the quanting or concentration. It can avoid reading mistake by eyes and make rapid, high sensitivity when using reader to detect the color change of test strip.

Product Superiority

- Plug-and-Play:** Simple and easy to use
- Built-in Printer:** Automatic report printing
- Multiple Interfaces:** Standard RS232, USB, LAN, supports LIS connection

Product Parameters

General Parameters

- Model:** FIA-200
- Dimensions:** 24 x 21.4 x 12 cm
- Weight:** < 3 kg
- Display Screen:** 7-inch
- Touchscreen:** Capacitive touch
- Operating System:** Android 4.4
- Methodology:** Time-resolved fluorescence
- Excitation Light:** 365 nm (customizable)
- Emission Light:** 610 nm (customizable)
- Channel Number:** 1
- Card Insertion Mode:** Manual
- Printer:** Built-in thermal printer

Urine Analyzer

H-III

Semi - Automated Urine Analyzer

Features

- Checking for ready to test strips automatically
- Internal calibration for the sensitivity of strips
- External printer applicable and RS232 port to a computer
- The instrument can simultaneously perform 14 tests
- Automatically rectify the test results influenced by ambient temperature, automatically checks for ready-to-test strips, easy operation.
- Throughput Maximum 540 samples per hour.
- Display LCD screen, operation information and test result in Semi-Quantitative symbol and SI units.
- Printing Thermal printer or optional external printer
- Control function Self-check, testing and malfunction-verification by inbuilt microcomputer
- 10. Memory until 2000 samples
